EDUCATION

Physicist and computer scientist at Brest State A.S. Pushkin University (Student) (2020 - 2024')

- HTML, CSS Course (SoloLearn.com)
- Python Course (Stepik.org and SoloLearn.com, w3school.com)
- UX/UI Design (itlogia.ru)
- Frontend Start (itlogia.ru)
- Automated Testing Basic (Epam Training Centre)

BRIEFLY ABOUT MYSELF:

- Hi, **my name is Vlad**. I'm 19 years old person. Now I am a second year student at *the Faculty of Physics and Mathematics* in the Brest State A. S. Pushkin University. I study physics and computer science. My goal is to create products that can understand humans an intuitive level and be understandable to users. Maybe I'm a madman. Confident that I can change the world. Motivated by the story of Steve Jobs and Pavel Durov.
- I will be glad to cooperate with your company :)

ABOUT MY EXPERIENCE IN PYTHON DEVELOPMENT:

- So, first of all I'm a beginner in this sphere of development. I'm learning Python on the popular platform and books, it's called Sololearn, Hexlet.io, w3school and stepik.org, where I got my first knowledge and experience in Python. At the moment I have little experience in development.
My own non-commercial projects:
- **Calculator.** In my idea: make the calculator for Windows OS which will be look like as calculator from macOS(Apple). I wrote a simple python calculator with a primitive interface. I'm used a GUI, which called «TKinter», it's look like as Delphi from 2007 year. That's explain why my calculator look so strange. In plans, I want to write this calculator on a new GUI(Integrated with JS, it's make it more beautiful) or use PyQt 6 and add new features.
- **BrestCars**, (in progress) In my idea: make the web-application for people, who want to rent any available cars in Brest City, I use the following technologies: HTML, CSS, JS(try change to Pyscript), Python with Django and Flask frameworks. Now developing a web application on the Flask framework, the next major version will be on the Django.

VLAD KIRICHUK

PYTHON CANDIDATE

LANGUAGES :

- English - Intermediate (B1). Intermediate. I have experience of communicating with native speakers from America. It was funny. I admit that at the beginning I encountered a language barrier, but we quickly found a common language and could communicate on secular topics. My profile on Duolingo. I am improving my English language skills.
- Russian, Belarusian - Native.
- Polish - A1 (in progress)

ABOUT MY EXPERIENCE IN PYTHON DEVELOPMENT :

My future project:

- **BarberShop (Web&Mobile Application).** This project will be built on the basis of an already working barbershop website. I plan to completely change the concept of design using my experience in UX/UI design. After that, I will be engaged in self-layout of the site according to the layout and linking it with the Django/Flask framework. As I gain experience, I will add my ideas and new features to this project. I also plan to use the experience of past projects. I will use the following technologies: HTML, CSS, JS(try change to Pyscript), Python with Django and Flask, UX/UI Design with Figma

SKILLS :

- Python (Basic Skills, OOP, PyQt, TKinter,), Django and Flask frameworks - in progress.
- Computer Science (CS50), also complete this course in Epam Training Centre.
- HTML(HTML5), CSS. + DevTools.
- JavaScript(Beginner).
- UX/UI Design (UX&UI conceptions, Typography, Coloring, Layout, Website builder, Adaptive design).
- Java + Tests - in progress at Epam Training Centre.
- C# - study at the university.
- Git (Console/Bash and GUI), GitHub.
- Software Development Methodologies, OOP, SOLID.
- Brackets / VSCode, PyCharm(Python, Django), WebStorm(HTML, CSS, JS), IntelliJ IDEA (JAVA+Tests), Figma, Photoshop, Ligtroom (UX/UI Design)
- Now I'm looking for new possibilities and people, with which we can develop our skills, also in programming. Interesting in Python Development, FrontEnd, BackEnd and create new products.
